

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER  
Monitoring Requirements Not Met for CITY OF VICTORIA

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During JUNE 1, 2021 – SEPTEMBER 30, 2021 we were required to collect 10 Lead & Copper samples from taps within our distribution system. We did not collect all of the required samples within the required time frame. Even though this was not an emergency, as our customers you have a right to know what happened and what we did to correct the situation.

What should I do?

You do not need to use an alternative (e.g., bottled) water supply. However, if you have specific health concerns, consult your doctor.

What does this mean?

This is not an immediate risk. If it had been, you would have been notified immediately

What happened? What is being done?

[Describe corrective action.] Our water system will be returned to compliance for this failure to monitor violation by collecting samples during the next available time frame for lead and copper samples which is JUNE 1, 2022 – SEPTEMBER 30, 2022

---

---

We anticipate resolving the problem within [estimated time frame] September 2022.
